

iI have been a subscriber to XM for over a year. When the traffic and weather channels came out it helped all truck drivers like myself to get off the road when there is severe weather and to avoid traffic congestion and accidents when present and i really belive that can help prevent other accidents from happening in some cases if people know ahead of time they can avoid them. And whit XM updating the info every 5 minuted it is much more reliable than the FM and AM stations.

thankyou for your time
